# Freelance Manager Upgrade

[Upgrade Manual]

Created: 08/28/2014

By: [wojoscripts.com](http://wojoscripts.com)

<http://wojoscripts.com/fm/>

Thank you for your purchase! If you have any questions that you feel should have been in this document, please log in using the account used to purchase the file and email via my user profile page contact form there. Thanks!

For questions on basic HTML, JavaScript or CSS editing - please give your question a quick Google or visit W3Schools as theme issues get top priority.

Version 3.00

# Requirements

In order to install and use Freelance Manager v.3.0 you must have Freelance v.2.02 already installed.

# Upgrade

Note that due to complete change in file structure, all of FM files will be replaced. However your database will be intact.

Unzip full package into your local drive, but skip **/uploads/** folder in order to prevent demo files overwriting your files. If you don't have WinZip, you can download it for free <http://winzip.com>.

Using an FTP program (such as Filezilla, which is free, or a commercial package such as CuteFTP), login to your web server and copy all files across into your Freelance Manager root directory, keeping the same file/folder structure.

## Upgrade Wizard

Freelance Manager includes a simple two step upgrade process. To start the upgrade wizard, navigate to the directory that you installed Freelance Manager, for example: <http://www.example.com/upgrade.php>

The Upgrade wizard will appear. Follow simple on screen instructions.

## Post Upgrade

Please follow these steps to complete upgrade process:

1. Due to the different html layout you must recreate Visual forms and Estimator layouts. Your existing fields will be intact.
2. New language file format will require translation of the existing language files unless English is used as default language.
3. Copy `/lang/en/` folder and rename it to `lang/fr/` or whatever you choose for your two letter country abbreviation code. Open up `lang/fr/lang.xml` and start translating. You can do this from admin panel, or using text editor.

# What's New?

Version 3.0 brings lot's new and existing features.

- New Front end design
- New Admin panel design
- New Language files (xml) format.
- Edit language phrases from admin panel
